Numera Drive, Folder, and Server Access

Access to the shared drives and folders for Numera's subsidiaries—MyStartUpCFO (MYCFO) and MyTaxFiler (MTF)—is managed through the security groups listed below.

Format: Drive - Security Group (drive on the left of the hyphen; security group on the right).

Hosted on NFS02:

MYCFO-ClientData - MyStartUpCFO ClientData Share

Hosted on NFS01:

MTF-Bookkeeping - MyTaxFiler BookKeeping Share

MTF-ClientData - MyTaxFiler ClientData Share

Lacerte - MyTaxFiler Lacerte Share

Drake - MyTaxFiler Drake Share

The screenshot shows the Active Directory Users and Computers console. On the left, the tree view is expanded to 'Groups' under the 'Numera' domain. 'MyStartUpCFO' and 'MyTaxFiler' are highlighted. The main pane displays a list of security groups. In the first screenshot, 'MyStartUpCFO ClientData Share' is highlighted. In the second screenshot, 'MyTaxFiler BookKeeping Share' and 'MyTaxFiler ClientData Share' are highlighted.

Name	Type	Description
MyStartUpCFO ClientData Share	Security Group - Global	
MyStartUpCFO QBData Share	Security Group - Global	
QB - Vixr Inc	Security Group - Global	
QB - Akin Health	Security Group - Global	
QB - Alltius Inc	Security Group - Global	
QB - Amit Patel-Books	Security Group - Global	
QB - Assertion Cloud	Security Group - Global	
QB - BrainGain Israel Inc	Security Group - Global	
QB - ColigoMed	Security Group - Global	
QB - Curer Inc	Security Group - Global	
QB - Daniel Personal	Security Group - Global	
QB - Draper Decentralized	Security Group - Global	

Name	Type	Description
MTF-Exton	Security Group - Global	
MTF-Irvine	Security Group - Global	
MTF-Keller	Security Group - Global	
MTF-Lewisville	Security Group - Global	
MTF-Milpitas	Security Group - Global

QB - P2P	Security Group - Global	
QB_Nilesh Katkade	Security Group - Global	
QB_TEST	Security Group - Global	
QB-3G	Security Group - Global	
QB-3GA	Security Group - Global	

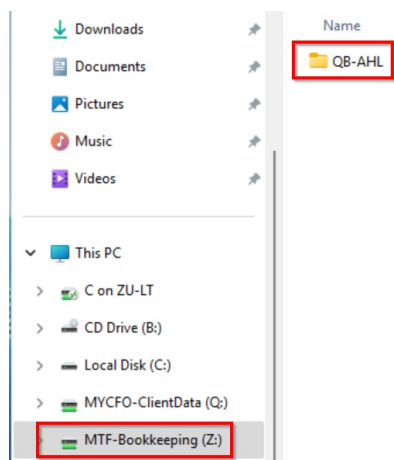

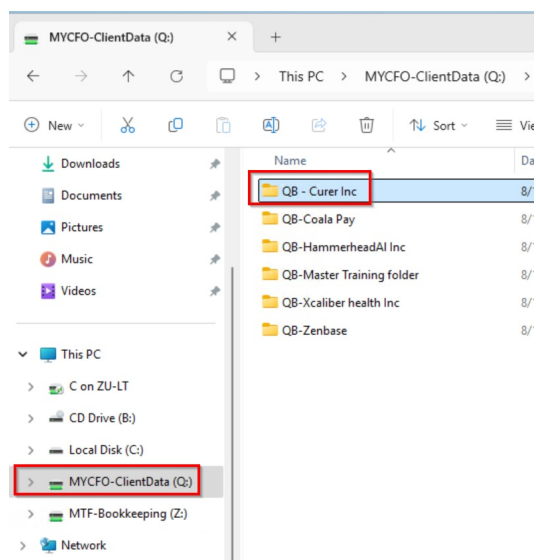

Access to the folders within each of the drives is controlled by adding users to security groups with matching names. For example, adding a user to the "QB - Curer Inc" security group grants access to the "QB - Curer Inc" folder on the MYCFO-ClientData drive.

The same access model applies to folders within the MTF shares.

Name	Type	Description
MyStartUpCFO ClientData Share	Security Group - Global	
MyStartUpCFO QBData Share	Security Group - Global	
QB - Vixr Inc	Security Group - Global	
QB - Akin Health	Security Group - Global

MyTaxFile	QB-AGT	Security Group - Global
Users	QB-AHL	Security Group - Global
	QB-AHT	Security Group - Global

ABE (Access-Based Enumeration) is enabled on the drives (shares) so users only see the folders they're permitted to access. Any folders they don't have permission to—based on their security group memberships—are hidden from view.

MTF accesses Drake, Lacerte, and QuickBooks.
MYCFO accesses only QuickBooks.

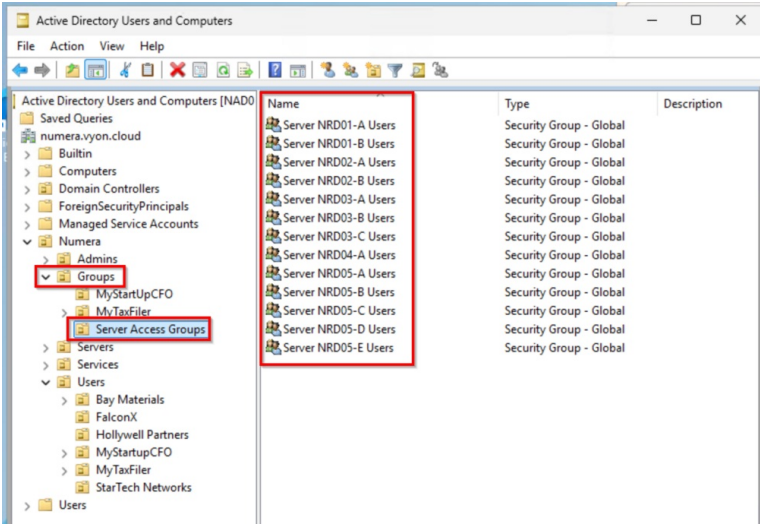

MTF Servers:

NRD01-A -Drake
NRD01-B -Drake
NRD02-A -Drake
NRD02-B -Drake
NRD03-A -Lacerte
NRD03-B -Lacerte
NRD03-C -Lacerte
NRD04-A -QB & Lacerte (This is the only QB server for MTF currently)

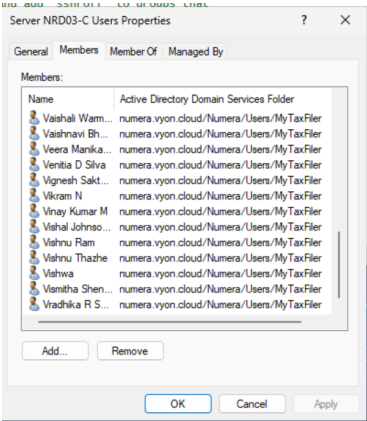

MYCFO Servers:

NRD05-A -QB
NRD05-B -QB
NRD05-C -QB
NRD05-D -QB
NRD05-E -QB

Users will need to be split up evenly between the servers. The list of users with access to each server can be viewed and assigned through the server access group policy:

When adding new users based on what server access they require, simply review how many are assigned to that server and add them to the specific server (Drake servers, Lacerte, Quickbooks (MTF or MYCFO QB servers)) with the least amount of users assigned.

[Block/Disable QuickBooks Automatic Updates](#)

- <https://quickbooks.intuit.com/learn-support/en-us/other-questions/disable-auto-update-in-quickbooks-desktop-2023/00/1454170>

- Applied on
 - NRD04-A
 - NRD05-A
 - NRD05-B
 - NRD05-C
 - NRD05-E

1. Open the year of QuickBooks that Automatic Updates need to be disabled on.
2. Navigate to the **Help** menu and select **Update QuickBooks Desktop**.
3. Open the **Options** tab to find the folder listed under the **Download Location** section.
4. Use file explorer to locate the folder.
5. Right-click on the QB Download folder (DownloadQBxx - 34, 33, etc.) and select **Properties**.
 1. "C:\ProgramData\Intuit\QuickBooks Enterprise Solutions 24.0\Components\DownloadQB34"
6. Click on **Security**, then choose **Edit** to modify permissions.
7. Deny **Write** permissions for the **Everyone** and **System** users.
8. Hit the **Apply** button to save the changes.
9. **NOTE** Make sure this is only applied to the DownloadQBxx folder as applying it to the parent Components folder, etc. can cause that version of QB to not open.**

To update QuickBooks periodically, remove the Write Deny Permissions for both Everyone and SYSTEM on each year's folder, run QB updates, and re-apply the permissions to disable automatic updates again.

[QBO to QBD migration and 1009 error for certificate](#)

How to migrate from QBO to QBD:

https://quickbooks.intuit.com/learn-support/en-us/help-article/import-export-data-files/export-convert-quickbooks-online-data-quickbooks/L0tKtLwhn_US_en_US

Migration Tool Installer is attached on the right of this page under attachments.

Step 1: Download the migration tool in QuickBooks Online

1. Sign in to [QuickBooks Online](#).
2. Go to the [Export Overview page](#).
3. Select **Get Started**.
4. Select **Download tool**.
Note: Keep this page open on your browser.
5. Install the migration tool, then select **Next**.
6. Read and accept the terms of the license agreement, then select **Next**.
7. Select **Install**, then select **Finish**.

Step 2: Export your QuickBooks Online data

1. In the **Step 1: Prepare to export** page, select **Continue**.
2. Select the QuickBooks Online data you want to export, then select **Continue**.
Note: You can either choose All financial data or All financial data without transactions. For products and services, inventory isn't exported.
3. In the **Step 3: Request your data** page, select **Continue**.
4. Fill in the **Name** and **Email address** fields, then select **Continue**.
5. Select **Close**.
Note: Email confirmation may take time depending on the amount of data you want to migrate. Check your QuickBooks Online homepage for updates.
6. Go to the [Export Overview page](#).
7. In the **Step 1: Prepare to export** page, follow the instructions for online migration. Then, select **Continue**.
8. In the **Exporting from QuickBooks Online** page, select **Continue to Download** then select **Download QBXML file**.
9. Save the file to your desktop, then select **Continue**.

Step 3: Run the QuickBooks Desktop migration tool

1. In the QuickBooks Desktop Migration tool, select **Browse**, select your QBXML file, then select **Open**.
2. Open QuickBooks Desktop. In the No Company Open screen, select **Create a new company**.
3. In the What does creating a company file require? screen, select **For myself**, then select **Start Setup**.
4. In the sign in screen, go to the **Sign in Later ▼** dropdown, then select **In 2 days**.
5. Select **OK**.
6. In the migration tool, select **Import**, then choose the location of the file and name the file.
7. Select **Save**.
8. In the application certificate, select **Yes, always allow access even if QuickBooks is not running**.
9. Select **Yes**, then select **Continue**.
10. Select **Done**.
11. In the **Update Business Info** screen, fill out the fields then select **Save**.
12. Select **Sign in now**, then select **Start Working**.
13. In the **Intuit Account** menu, select **Admin**, then enter your email address.
14. Select **Continue**.
15. In the **Sign In Later ▼** dropdown, select **In 2 Days**, then select **OK**.
16. Wait for the import to finish, then select **Done**.

Note: If you want more information about this tool, check out [Desktop Migration Tool FAQs](#)

Step 4: Check if the data exported matches

After you export your data, run a profit and loss report in QuickBooks Online and QuickBooks Desktop to compare your books.

Note: Run reports on accrual basis in QuickBooks Online and QuickBooks Desktop to match and compare them.

1009 Error (discontinue analytics under help worked):

<https://quickbooks.intuit.com/learn-support/en-us/other-questions/migration-error-1009/00/1448876>

When you have QuickBooks desktop open before opening the migration tool click on Help - QuickBooks Desktop Usage & Analytics Study and click Discontinue. Then open your migration tool and import the file, you should get the certificate window to allow access.

[Documents](#) / [BigTime QuickBooks Sync Agent](#)

BigTime QuickBooks Sync Agent

The sync tool on NRD05-C is currently used only by Ravita Kumari. Access to this tool on the server should be restricted as much as possible so that only her account can use it.

At times, the sync tool stops working for Ravita, preventing her from launching or opening the sync agent. This may be due to compatibility issues with Windows Server 2025. The resolution that has worked so far is to uninstall and then reinstall the tool. After reinstalling, it should be removed from the public desktop and startup folders (paths listed below) and added only to Ravita's desktop and startup folders so that she alone has access to it.

The installer is located in the software folder on NFS02: \\nfs02\d\$\Software\BTSyncAgent.msi

Remove the agent shortcut from the following folders after repair/reinstall:

C:\ProgramData\Microsoft\Windows\Start Menu\Programs\Startup

C:\Users\Public\Desktop

Add the shortcut to the following folders:

C:\Users\rkumari\AppData\Roaming\Microsoft\Windows\Start Menu\Programs\Startup

C:\Users\rkumari\Desktop

Transaction Pro Importer Cannot Connect to your data source.

If users are experiencing this error when trying to import XLSX or Access files.

Confirm Microsoft Access Database is installed. If it isn't use the attached file on the right and install it on the server the person with the error is getting.

<https://transactionpro.happyfox.com/kb/article/658-microsoft-access-database-engine-is-required/>

- Go to the computer's Add or Remove Programs
- Verify that the Microsoft Database Engine 2010 is installed.
- If it is installed, select it and click REPAIR.
- If it is not there, then reinstall following the instructions above according to which version of Microsoft Office that is installed.
- If it is not the correct version installed (should be Microsoft Access Database Engine 2010 32 bit version), uninstall the incorrect version and reinstall the correct version following the instructions above according to which version of Microsoft Office that is installed.
- Verify that there is not more than one set of Microsoft Access Database Engine drivers installed at the same time.
 - If there is more than one set, remove until only one remains and verify that the one remaining is the correct version.

Lacerte OverLoad Error

Changes Made

1. If the error message includes "java.lang.OutOfMemoryError: Java heap space", this indicates that Lacerte is running out of available memory.
 - You can try to increase the Java memory allocated to Lacerte.
 - **For Lacerte 2017 and newer:**
 - Close Lacerte.
 - Go to `C:\Lacerte\YYtax` where `YY` is the tax year.
 - Locate and open the `atebridge.dll.config` file with a text editor like Wordpad.
 - Find the line `<JvmOption switch ="Xmx" value="768m"/>`.
 - Copy and paste this line after itself.
 - Change the value from `768m` to `1024m`.
 - Save the file and restart Lacerte.
 - **For Lacerte 2016 and prior:**
 - Close Lacerte.
 - Browse to `C:\Lacerte\YYtax`.
 - Rename the file `JX.config-template` to `JX.config`.
 - Open the `JX.config` file with Notepad.
 - Find the line that reads `-Xmx384m` and change the value to `512` (or adjust by intervals of 32 between 128 and 640).
 - Save the file and restart Lacerte.

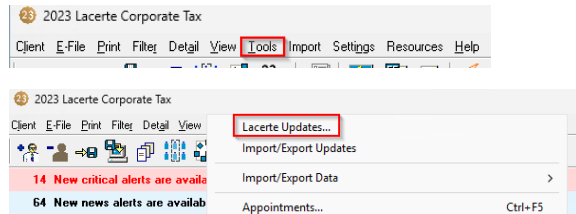

Security Access:

All users with access to Numera

Lacerte Updates

Lacerte 2024 is set up for automatic background updates, but the other years are not.

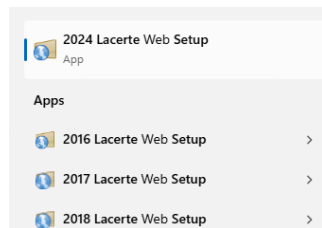

Lacerte 2024 may still need to be checked manually to verify it's on the latest version. You can do this by going to Tools > Check for Updates, which will notify you if the program is already up to date.

If the update downloads but you don't receive a prompt confirming that the program is on the current version when you check again, the update may not be completing properly.

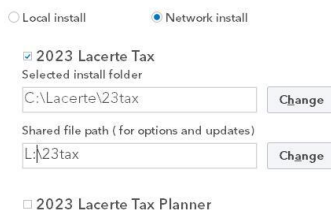

You'll need to run the web setup to reinstall that specific year of Lacerte, which will also apply the most recent updates.

Search for the specific year's web setup in the start menu and run it.

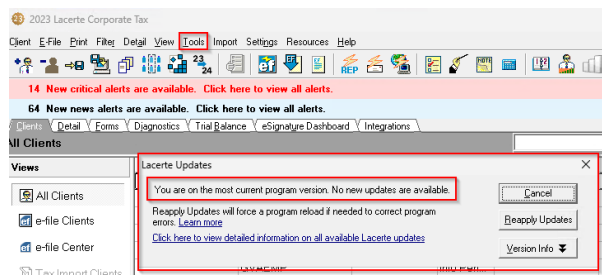

Uncheck Tax Planner and adjust the shared file path as seen below:

L:\23tax

Leave the modules check boxes default and begin the installation.

After completing the installation, check for updates in tools again to verify the update was completed successfully as seen below.

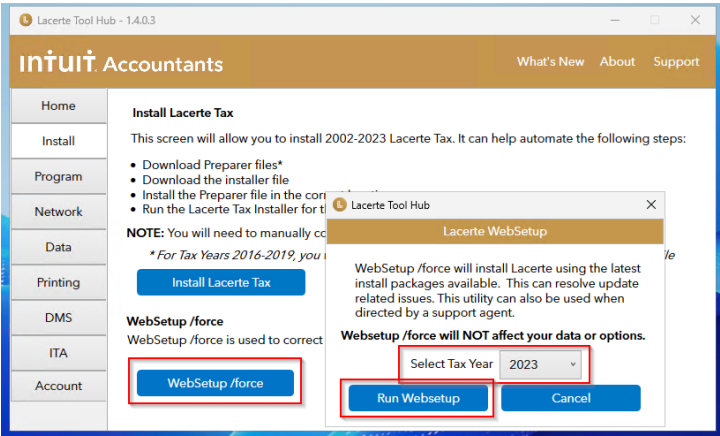

It appears that running the web setup on one server may resolve the issue on the others, allowing you to complete the updates for that specific year without running the web setup on each server.

The same steps apply for the other years of Lacerte. If the update process gets stuck at any point, or if the prompt mentioned above doesn't appear, you may need to reinstall that year of Lacerte using the web setup.

Always verify that the Lacerte Updates message prompt shows that you are on the most current program version.
Even if it states that the update was downloaded, it may not have applied correctly, or the update may fail to complete even if you let it run indefinitely.

If the web setup does not work, try running the web setup /force via the Lacerte Tool Hub.

Further update issue troubleshooting:

https://accountants.intuit.com/support/en-us/help-article/system-responses/setup-hangs-freezes-downloading-lacerte-web/L89KSYBkZ_US_en_US?srsltid=AfmBOogHI3giqpn2X7_iBSRmzD8ERquDCbDKIX26vxQ0Ejhla6HK2uZ-

Worked for updates when the Tool Hub Web Setup /force did not:

1. Close all applications.
2. Delete the content of the your Windows**Temp**.
3. Press the Windows + R key and press Enter.
4. Type **%temp%** and press **Enter**.
5. Press **Ctrl+A** on the keyboard to select all the files in your **Temp** folder.
6. Once the files are highlighted, press the **Delete** key and confirm the deletion.
 - o Some files in the Temp folder may be in use and cannot be deleted. If you may see a message that some files are in use, click OK to close the message.
7. Using Windows Explorer, browse to the Lacerte System File Path folder. To find the System File Path location, open the Lacerte program and press F10 on your keyboard. Scroll down and look for the **System File Path**.
 - o Standalone users: The System File Path is usually located on the local drive.
 - Ex: C:\Lacerte\YYTax\
 - o Network users with a shared options folder: Navigate to the network drive that stores the System File Path.
 - Ex: X:\Lacerte\YYTax\
8. **Right-click** on the **SetupYY** folder and click **Rename**.
9. Rename the folder to **SetupYYold**.
10. Reboot the server.
11. Then download the Lacerte program after deleting the temp files and renaming the Setup folder.
 - o Download Lacerte using the Websetup.exe file on your computer, Select the Windows Start button, go to **tPrograms** or **All Programs**⇒ **Lacerte** ⇒ **20YY Lacerte Web Setup** and follow the instructions on the screen.
 - o Download Lacerte using Web Downloads: go to your [My Account](#)
